

### Integrated Medical Bed Head Unit

We are a manufacturer in China, and we usually produce DFTT® Integrated Medical Bed Head Unit, which is specialized in medical treatment. We have our own factory to directly produce Integrated Medical Bed Head Unit, so we don't need to fake it. For this reason, Integrated Medical Bed Head Unit is cheaper than other similar products, but the reduction of price will not lead to the decline of quality and shortage of supply, which we can assure you. Here, we sincerely hope you can consider our affordable and safe products, we are looking forward to working with you.

### Product Description

DFTT® Integrated Medical Bed Head Unit is made by A6061, excellent quality, realizing human-computer interaction, meeting the requirements of both beauty and function to the greatest extent. Integrated Medical Bed Head Unit adopts professional design. Designers start with modern technology and analyze specific problems to make high-quality products. Up to now, Integrated Medical Bed Head Unit has been sold all over the world and trusted by the people. Therefore, we also hope to become your partner.

### Product Parameter

Product name	Shape	material	size	color
Integrated Medical Bed Head Unit	irregular shape	A6061	118*30*100CM	white customized

### Integrated Medical Bed Head Unit Feature And Application

The selling point of Integrated Medical Bed Head Unit is that it is not only the equipment of a ward, but also the straw for patients to save their lives. In many cases, the shortage of manpower can be made up by machines. When manpower is in urgent need, Integrated Medical Bed Head Unit is particularly important. The Integrated Medical Bed Head Unit can sound the alarm in time, attract the attention of doctors and nurses, so as to avoid the occurrence of tragedies. The Integrated Medical Bed Head Unit is characterized by stable structure, high security, and a more reasonable layout with modular design. While the Medical equipment plays its own role, it does not affect each other, and it is more coordinated with the ward environment.

### Integrated Medical Bed Head Unit Details

Compared with the traditional medical Bed Head Unit, the DFTT® Integrated Medical Bed Head Unit has greater flexibility in the decoration of the supporting ward. It can be adjusted according to the equipment style of the ward. The plate color is diversified, and the decoration effect of the whole ward is more harmonious and warm. Reduce the patient's pressure in hospital, relieve the mood, play a positive role in the treatment of the disease.
